

I respectfully urge the FCC to reject the National Association of Broadcasting petition 04-160.

To me the satellite service that I PAY FOR represents the best of Free Enterprise. I am voting with my wallet, and I am voting for satellite radio. If someone wishes to dial through the vast wasteland of AM and FM radio, fine by me. I choose to pay for satellite radio.

I resent the NAB trying to force the FCC to restrict my PAID FOR service to only services that they (the NAB) deem to be suitable.

If the NAB (and its supporters) cannot compete with the vastly superior services sold to me by their satellite competition, then perhaps they should improve THEIR level of service. Not restrict my access to another service that I PAY FOR.

Thank you for your attention to this matter.
